

Waste Disposal Guidelines in Yotsukaido City

~Please Dispose of Waste According to the Rules~

- Yotsukaido City has no place to landfill its waste.
- To reduce waste, we have established rules for waste disposal based on the
 - * “3Rs” principle.
 - * “3Rs” stands for Reduce, Reuse, and Recycle.
- Let’s keep our town clean by having each person follow these rules.

1 Sort waste properly.

- There are various types of waste , such as burnable and unburnable waste.
- Specific bags are designated for each type of waste.
(Please refer to the reverse side.)
- Do not mix different types of waste together.

2 Take your waste to the collection point.

- Take household waste to the designated collection point.
- Ask your neighbors, the neighborhood association, or the building manager for the location of the waste collection point.

3 Take it out on the designated day and time.

- Days for each type of waste are designated.
- Take your waste to the collection point by 8:30 AM.

4 Dispose of household waste.

- Waste from companies or stores cannot be placed at the waste collection point.

Principle of 3Rs

Reduce … To reduce the amount of waste

Reuse … To use things repeatedly

Recycle … To convert waste into reusable materials
